

BEE GARDEN STOVE

MODEL: MK12

Heat Output
(Nominal - Minimum)
Pellet
12 kW

electric power

Usage times with battery
level 1 : 6 hours
level 2 : 4.5 hours
level 3: 3 hours

kg - lt
10 - 17

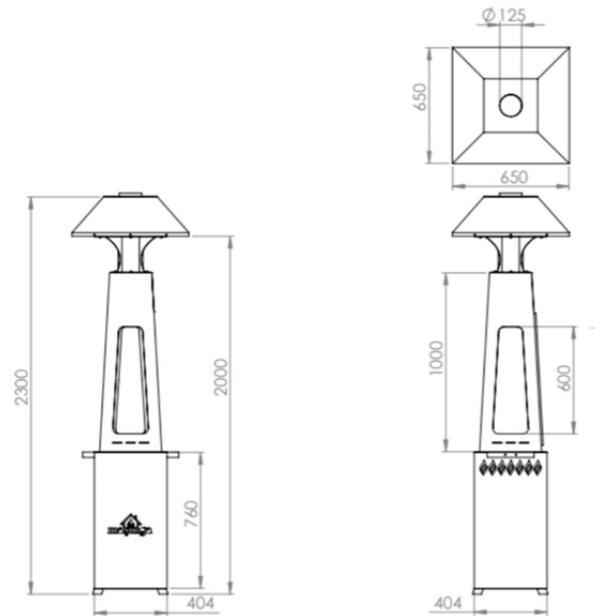

Product
Weight
85

Chimney
Diameter
130mm

PRODUCT FEATURES: It's an ideal solution for Hotel, restaurant, cafe, winter garden, workshop, outdoor promotion organizations, winter festival areas. It adds value to spaces visually and aesthetically. Pellet Fuel, is environmentally friendly, highly efficient. Pellet fuel is easy to supply and 50% more economical compared to other energy sources. Electricity consumption is required for the fan. It provides extra safe use in case of power cuts thanks to its battery powered power supply. Pellet fuel grains in the fuel tank are automatically poured into the combustion reactor depending on the burning speed. The first firing is manually ignited in a very easy way. 4 sides are equipped with ceramic fireplace glass. While emitting heat, the flame can be seen from every angle and has an aesthetic design. It is easy to clean. After ignition, the time to reach the desired temperature is short and it is a useful and practical fireplace. The stove is coated with high temperature resistant, smokeless black German Senotherm paint.
