Chimney Diameter
130mm

The specially designed Hybrid Stove features ideal dimensions for residential use. Operating with high efficiency on pellet fuel, it is also fully capable of burning wood logs and briquettes. The combustion process requires no electrical power, making it a completely independent heating solution. To maximize thermal efficiency, the interior of the combustion chamber is entirely lined with special vermiculite bricks. The stove is coated with high-temperature resistant, smokeless black German Senotherm paint for extended durability. Additionally, one premium enamel baking tray is included for the oven compartment.

27cm x 38cm
